

COMPANY PROFILE

Professional Surveying • Geospatial • LiDAR • Drone Mapping • Infrastructure

Advanced Survey Technology

LiDAR Drone Survey • RTK Drone Survey • Drone Photogrammetry • DGPS / GNSS • Total Station • 3D Mapping • CAD / GIS

Proprietor: **MAHESH DEHМУKH**

Pune, Maharashtra

01 | COMPANY OVERVIEW

Reliable Land Survey Consultancy is a professional surveying and geospatial service provider focused on accurate field data, engineering-ready deliverables and dependable site support for infrastructure projects.

Our Positioning

Specialized Surveying & Geospatial Solutions for Metro Rail, Railway, Highway, Road and Infrastructure Projects, enhanced with modern drone, RTK, photogrammetry and LiDAR-based mapping workflows.

CORE STRENGTH	PROJECT SECTORS	DELIVERABLES
DGPS/GNSS Total Station Digital Levels RTK Drone LiDAR Drone	Metro Rail Railways National Highways PWD / PMGSY Roads & Infrastructure	Topo Plans L-Sections Cross-Sections CAD / GIS DEM / DTM 3D Mapping

02 | OUR SURVEY SERVICES

TOPOGRAPHICAL SURVEY

Contours, EGL, spot levels, terrain features, DTM/DEM support and detailed feature mapping.

DGPS / GNSS

Control points, coordinates, RTK observations, benchmarks and geodetic control.

TOTAL STATION

Detailed site survey, alignment, structures, as-built work and engineering measurements.

RTK DRONE SURVEY

High-accuracy aerial mapping using RTK-enabled drone technology for topography, corridor mapping, orthomosaic, DSM/DTM and survey-grade ground data.

LiDAR DRONE SURVEY

Advanced aerial laser scanning for high-density 3D point-cloud generation, terrain mapping, ground/non-ground classification support, corridor surveys, asset mapping and DTM/DSM deliverables.

DRONE PHOTOGRAMMETRY

Aerial orthomosaic, DSM/DTM generation, terrain mapping, corridor mapping and progress documentation.

ROAD / HIGHWAY

Corridor, L-section, cross-sections, drainage, structures, utilities and DPR survey support.

RAIL / METRO

Corridor, station/depot, track/alignment, pier/viaduct, utilities and asset inventory support.

CAD / GIS

Engineering drawings, coordinate lists, GIS-ready outputs, digital field data and mapping.

03 | DRONE & LiDAR EQUIPMENT

Advanced drone equipment listed for the company profile. For tender submission, ownership and specifications should be supported by actual records.

Equipment	Model / Make	Primary Use
LiDAR Drone	DJI Matrice 350 RTK + Zenmuse L1	LiDAR point cloud, terrain & 3D mapping
RTK Drone	DJI Matrice 300 RTK	RTK aerial mapping, photogrammetry & corridor survey

04 | INFRASTRUCTURE PROJECT SURVEY

Survey support for urban rail, railway, highways and infrastructure projects, with emphasis on accurate control, corridor data and engineering-ready outputs.

Metro Rail

DGPS control • Total Station survey • corridor topography • station/depot site survey • EGL • utility/structure inventory • pier/viaduct location support • L-section & cross-sections.

Railway

Railway corridor topography • DGPS control • alignment survey • track centre-line support • level survey • station/yard survey • bridge/culvert survey • utility survey • land/structure inventory • as-built survey.

National Highway & Road

Terrain, features, contours, EGL • carriageway, drainage, structures, utilities • L-section, cross-sections, chainage • DPR survey support.

05 | SURVEY EQUIPMENT

Instrument	Brand	Qty	Working
DGPS / GNSS	Leica	3	2
DGPS / GNSS	FOIF	3	1
Total Station	Leica	6	5
Total Station	PENTAX	2	2
Total Station	SOKKIA	3	2
Digital Auto Level	Leica	2	1
Digital Auto Level	PENTAX	1	1
Auto Level	PENTAX / Leica	2	1

Total listed survey instruments: 22 | Working: 15

06 | TECHNICAL MANPOWER

Resource	Total	Working
Site Engineers	2	2
Site Supervisors	4	4
Surveyors	10	9
Survey Assistants	8	7

Total technical manpower listed: 24 | Working: 22

07 | SURVEY METHODOLOGY & QA/QC

01 Project study & reconnaissance

02 Control establishment

03 Detailed field observations

04 Data processing & drafting

05 Independent checking

06 Final deliverables & report

Quality principles: Instrument readiness checks • reliable control points • field verification • coordinate/level cross-checks • drawing-to-field validation • documented survey records • technical review before submission.

08 | DELIVERABLES

- Topographical Plan
- Contour / Spot Level Plan
- DGPS Control & Coordinate List
- Benchmark Details
- L-Section
- Cross-Sections
- Alignment Data
- Road / Structure Inventory
- Utility Mapping
- CAD Drawings
- GIS-ready Data
- DEM / DTM support
- LiDAR Point Cloud / Classified Data
- Drone Orthomosaic / DSM
- 3D Terrain / Asset Model support
- Survey Report
- Digital Field Data

09 | CLIENTS & PROJECT EXPERIENCE

Client names, project/package, location, scope and year are intentionally left blank so they can be updated whenever required.

Sr.	CLIENT NAME	PROJECT / PACKAGE	LOCATION	SCOPE	YEAR

2					
3					
4					
5					
6					
7					
8					

10 | OUR DIFFERENTIATION

Field-ready survey capacity: DGPS, Total Station, levels and multiple field personnel.

Advanced aerial capability: LiDAR Drone and RTK Drone workflows for terrain, corridor and asset mapping.

Engineering-ready outputs: Plans, profiles, sections, coordinates, CAD/GIS, point clouds and 3D data.

11 | COMPANY INFORMATION
